

FAQ's

What Are Xtreme Lashes™?

Xtreme Lashes™ is a revolutionary new product that lengthens and thickens eyelashes. Xtreme Lashes™ are single strands of synthetic eyelashes that are curved to replicate a natural eyelash. They are applied to each individual eyelash on a hair by hair basis for a natural, elegant and luscious look. Xtreme Lashes™ is perfect for special occasions or for day to day wear.

What do they look like and how do they feel?

With proper application, Xtreme Lashes™ look and feel completely real!

How long do Xtreme Lashes™ Last?

When applied properly, semi-permanent Xtreme Lashes™ last the length of the natural growth cycle of your eyelashes. Xtreme Lashes™ glue is specially formulated with a unique waterproof bonding agent to last. Imitation products may not last as long because their bonding agent is not of the same quality as ours.

How often should I get touch-ups?

We recommend getting a touch up every two to four weeks. Your natural eyelashes fall off every 60 days due to the natural growth cycle and are naturally replaced with the growth of a new eyelash. A touch up is needed to replenish the fallen lashes. Touch ups generally take a short time and are relatively inexpensive.

Can I apply mascara to Xtreme Lashes™?

Indeed, one of the main advantages of Xtreme Lashes™ is never needing mascara again. However, if you absolutely must have it, **only water based mascara can be used** with Xtreme Lashes™. You can purchase our specially formulated Xtreme Lashes™ mascara from your local Xtreme Lashes™ representative. **DO NOT USE OIL-BASED OR WATER-PROOF MASCARA.** Waterproof mascara along with any type of oil based mascara can dissolve the bonding agent and cause the Xtreme Lashes™ to fall off.

Can I swim, shower, exercise, or visit a spa while wearing Xtreme Lashes™?

Yes. Our specially formulated bonding agent allows you to shower, swim, exercise, and spa worry-free while wearing Xtreme Lashes™. You can enjoy these lashes with little need to adjust your lifestyle. Do not swim or spa for 2 days ' after the procedure to allow adequate bonding time, after that you can swim and spa worry free.

Can I use Eyelash Curlers with Xtreme Lashes™?

You CANNOT use MECHANICAL eyelash curlers as these curlers will damage the Xtreme Lashes™. Xtreme Lashes™ are created with a beautiful curl, but for those of you who want an extreme curl look we recommend using our specially made heated eyelash curler that is safe to use with your Xtreme Lashes™.

How do I take care of Xtreme Lashes™?

Your new Xtreme Lashes™ are long, thick and beautiful! To maintain this look and extend the life of your lashes, follow these easy care instructions:

- Do not wash eyes, swim, or shower for 12 hours after lash application, preferably 24 hours to allow adequate time for bonding.
- Be gentle with your lashes.
- Avoid rubbing your eyes.
- Do not use an eyelash curler.
- Avoid oil-based makeup products, including mascara and eye-makeup remover. These will disintegrate the glue bond.
- With Xtreme Lashes™, mascara will not be necessary. However, if you absolutely must use it, use only water-based mascara. **Do not use oil-based mascara, or waterproof mascara.** Apply mascara on the tips, only. Use water based mascara sparingly because very frequent use may shorten the life of Xtreme Lashes™.
- Use only water-based facial cleansers.
- Use only water-based eye-makeup remover. Remember to be gentle with your lashes while removing eye-makeup.
- Do not visit saunas or steam rooms frequently. Routine exposure to heat may cause the bond to loosen.
- Apply Xtreme Lashes™ Longer Life coating agent 2 to 3 times weekly to your new lashes to preserve the look and extend the life of Xtreme Lashes™. Brush on from the base up to the tips. The coating also gives the lashes a wonderful shine!
- We recommend getting a touch up every two to four weeks.

Can you describe the application process?

You will recline comfortably on a massage table or spa chair with your eyes closed while an Xtreme Lashes™ technician applies Xtreme Lashes™ to each individual eyelash on a hair by hair basis. Depending on the amount of lashes needed, it generally takes between 60 to 120 minutes to apply one set of Xtreme Lashes™. Touch ups can be done in as little as 15 to 45 minutes.

Is the product FDA approved? Is it safe?

Currently the FDA is not regulating eyelash extensions because the eyelash extensions are applied to the natural eyelash hairs and do not touch the skin. The application process is pain-free and relaxing. In fact, most clients fall asleep during the procedure. However, improper application by an unqualified technician can cause damage to the eyes and eyelids. So we would recommend only using a certified Xtreme Lashes™ professional. All of PUURSPA's technicians are certified to use Xtreme Lashes™.

Why do you use 3 lengths of eyelash extensions?

We recommend using three lengths of Xtreme Lashes™ in order to provide you with a natural look and feel. The smallest eyelashes should go on the interior lashes of the eye, the longest lengths towards the middle, and intermediate lengths towards exterior of eye.

How many eyelashes are used for each application?

Many factors are considered when deciding the amount of Xtreme Lashes™ to apply. The amount of natural eyelashes on the client, the fullness preferred by the client, and the lengths used should all be taken into consideration. Each client will want a different type of look. Generally, for the most basic look 20-30 eyelashes are needed on each eye. For the most popular look: a full glamorous set, 40-70 eyelashes are needed per eye.
